## OVER 68 YEARS' EXPERIENCE IN WORKPLACE ORGANISATION

Professional consulting direct from the specialists

Since 1956, with the realisation of tailor-made workstation solutions we have been permanently assisting our customers in the process of creating healthier and more productive workstations for greater economic efficiency.

By implementing continuous training measures and by realising a huge number of diverse customer requirements, we ensure our technical consultants are consistently right up-to-date with the latest developments in workstation design.

ergonomie  
coach

Certified by IGR e.V.

KRIEG has also arranged for the IGR to certify its staff as ergonomics coaches. Our certified consultants will devise the perfect ergonomic concept to satisfy every aspect of your workstation needs.

## EVERYTHING IN RANGE FOR EFFICIENT WORKING

Better ergonomics - better productivity - better flexibility

Ergonomics, CIP, Lean Production and the 5S methodology are all highly important principles for our workstation solutions, as they enable us to constantly devise the right concept with the greatest possible optimisation potential for our customers.

For 67 years now, our efforts have ensured that people work productively, healthily and happily at the workstations we create. We achieve this by focussing on aspects such as reach optimisation, ergonomics, and the efficient supply of materials, and incorporating these into the development of our products.

**INNOVATION AWARD FOR  
ERGONOMICS 2023**

All our efforts have paid dividends! We have been awarded with the "Innovation Award for Ergonomics 2023" by the German Institute for Health and Ergonomics (IGR) for special achievements in the field of ergonomics. We are pleased to have been awarded again after the "Innovation Award for Ergonomics 2021".

## DEDICATED CONTACT PERSONS

Our consulting specialists are always ready to assist you

Our first priority is to be close to our customers! Our network of customer consultants means your needs can be documented on-site, giving you rapid assistance whenever you need it.

Wherever in Germany your production centre is based, we have a contact person for you in every region and area. This is a service that ensures the satisfaction of our customers.

## DETAILED ON-SITE ANALYSIS

Successful together

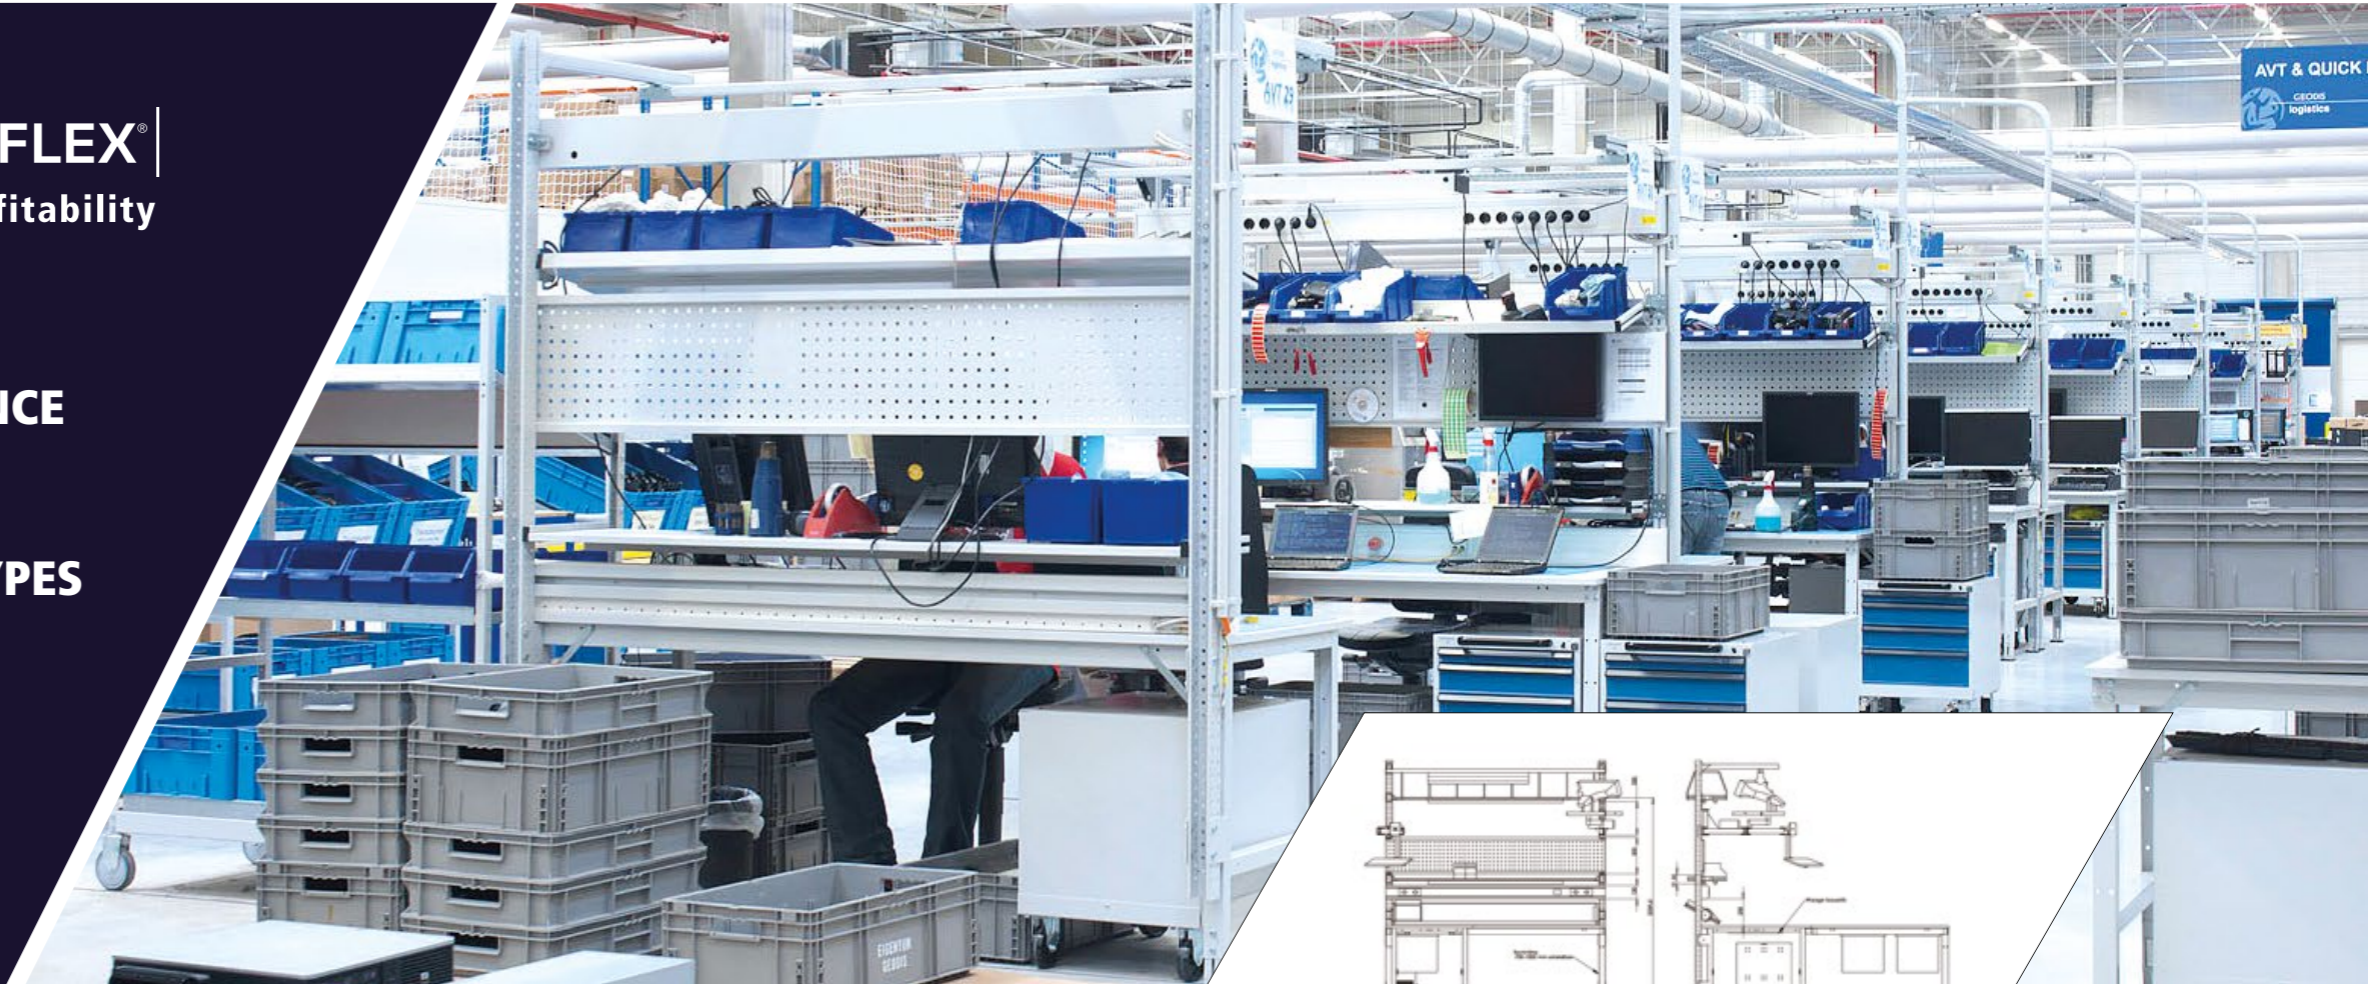

The detailed planning of workstation solutions necessitates a thorough on-site analysis, and we can offer you this crucial service. Tell us about your goals and requirements.

By diligently documenting the current status we will factor in all the relevant information into developing your specific workstation solution.

**KRIEG** | **WORKFLEX**

**OVER 68 YEARS OF EXPERIENCE**  
**CAD VISUALISATION**  
**TEST PHASE USING PROTOTYPES**

## IN-HOUSE DESIGN AND DEVELOPMENT

The right solution - every time

Our designers develop ergonomic workstation systems and custom-made solutions for the production/workshop, assembly, testing, and packing areas. We can also offer your optimum workstation solutions for the increasingly expanding ESD area.

Whether it be single workstations, group workstations, or an assembly-line production setting – we will identify the solution that best suits your needs. With the standards of a German manufacturer and the expertise of our proficient team, we ensure effective working processes, not to mention top-grade product quality.

## PROFESSIONAL CAD VISUALISATION

Precise job quotations prepared by our planning experts

Together, we will develop your custom-made workstation solutions step-by-step, ensuring all necessary accessories and components are included. Our designers' detailed 3D drawings enable the devised solutions to be visualised.

We combine the latest scientific research results with many years of experience in the area of workplace organisation.

## STANDARD PROGRAMMES BASED ON OUR COST-EFFICIENT MODULAR SYSTEM

Quickly and surely to the perfect workstation - step-by-step

**Plan your very own workstation step-by-step!**  
Our product guide system takes you through our Standard range in just 9 simple steps, and ensures no important components or accessories are forgotten.

All our WORKFLEX workstation system series are based on serial manufactured standard components. The addition of tried and tested accessory elements allows us to create ergonomic, efficient workstations in no time. And when that's no quick enough, all of our product lines contain numerous articles ready for dispatch in just 48 hours!

## TAILOR-MADE SOLUTIONS

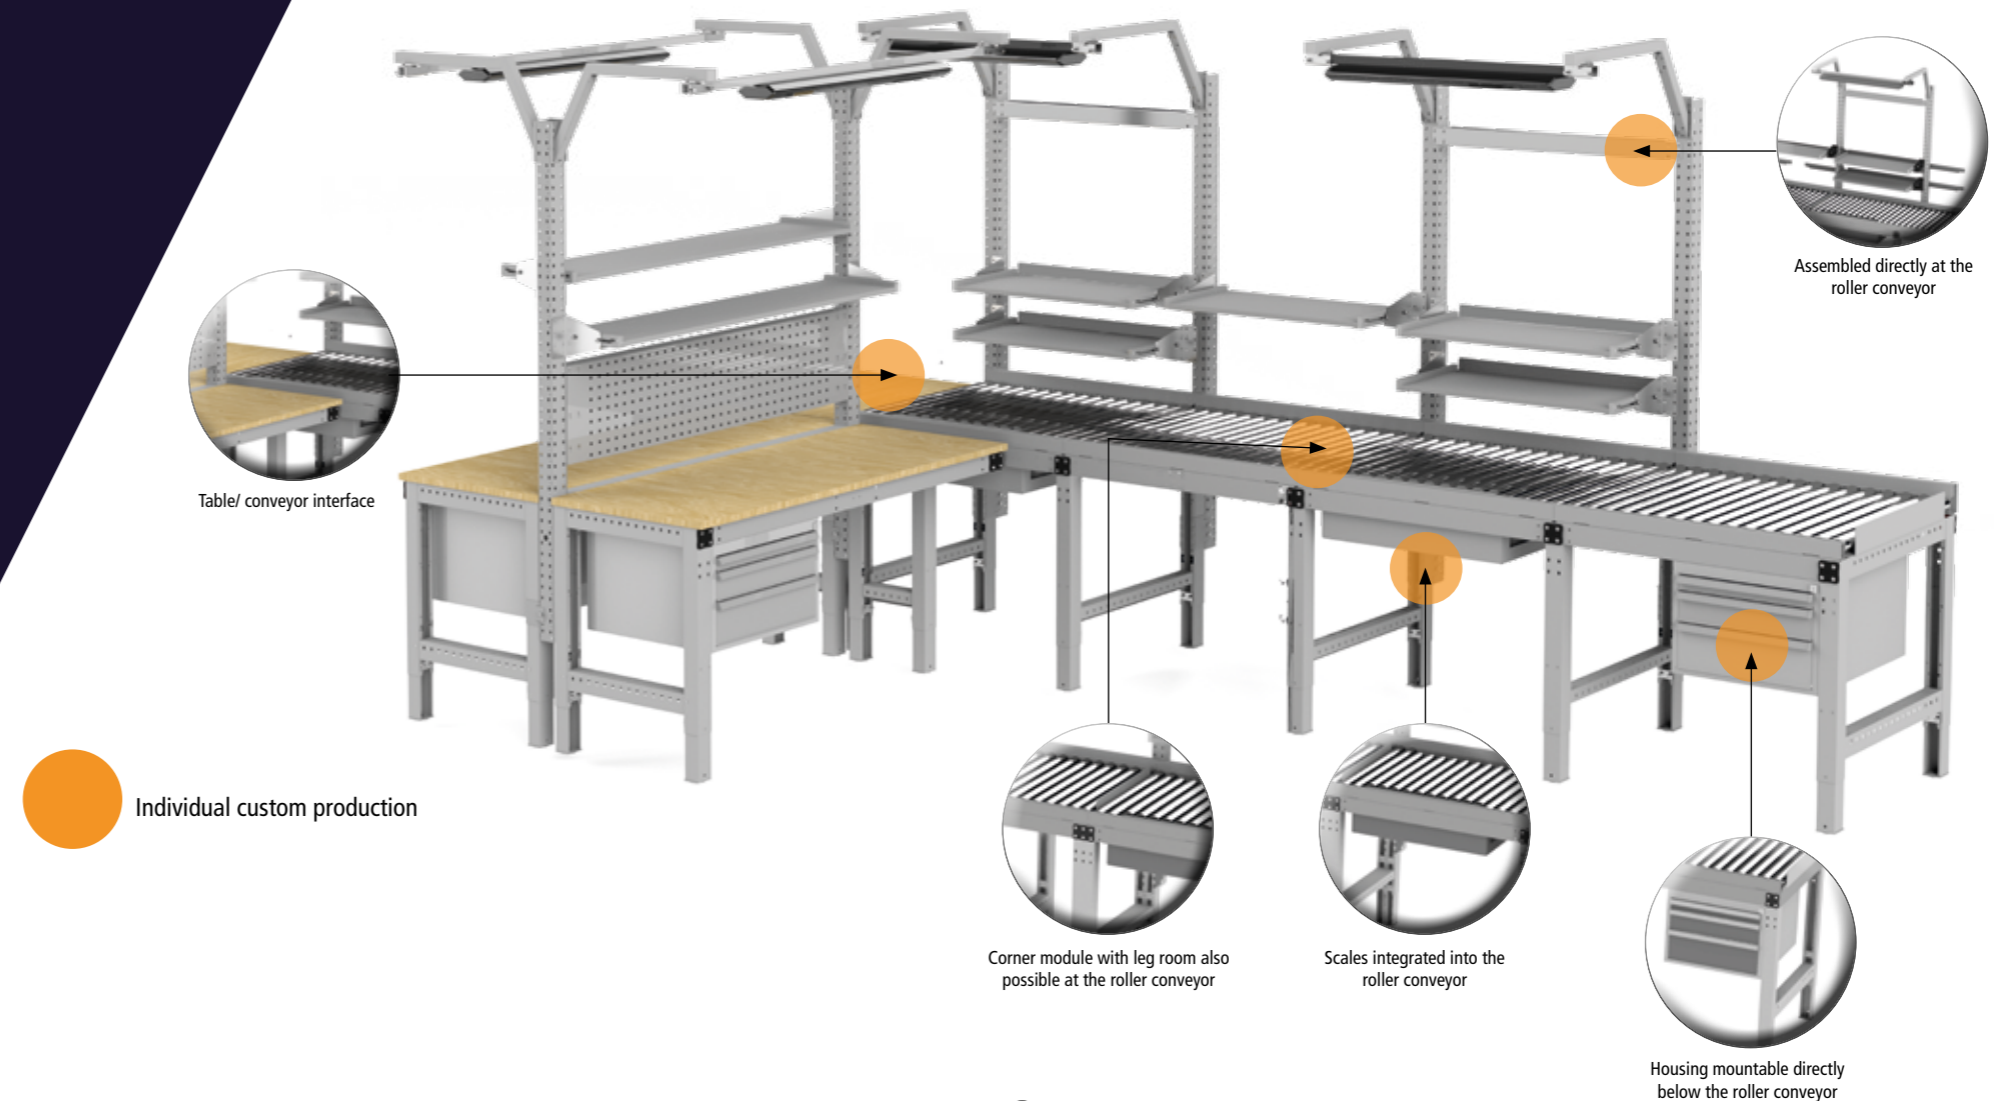

Individuality is our strength

Our forte is individuality in workstation design! Standard components cannot always perfectly satisfy every requirement. Our designers are on hand to help by creating individual tailor-made solutions specifically for you.

They will work closely with you to plan and devise precisely the workstation solution needed for your specific activity. You will be continuously and transparently consulted during the development process, and be given exact information on every necessary tailor-made part.

**KRIEG** | **WORKFLEX** |

**PRACTICALLY STANDARD**  
**INDIVIDUALLY CUSTOMISABLE**  
**ECONOMICALLY PERFECTED**

## ECONOMY BUILT IN

Optimum functionality and ergonomics with the least possible investment cost

### Economy is our overriding principle!

We keep our customers' investment costs as low as possible by always using as many standard components as possible. It's a process in which our specialist consultants and designers permanently focus on drafting a cost-effective and consistently transparent job quotation.

Any necessary, individual custom components will only be included following close consultation with our customers. We call this the "customisable standard" approach, and it delivers our customers an optimum level of functionality and ergonomics with the least possible investment cost. Our functional motto is "As much STANDARD as possible, as much CUSTOMISED as necessary".

## THE INNOVATIVE WORKFLEX METHOD

As much STANDARD as possible, as much CUSTOMISED as necessary

### Applying the standard creates transparency and generates trust!

Customer satisfaction is at the core of what we do. We determinedly create and enhance the requisite trust right across our entire value creation chain.

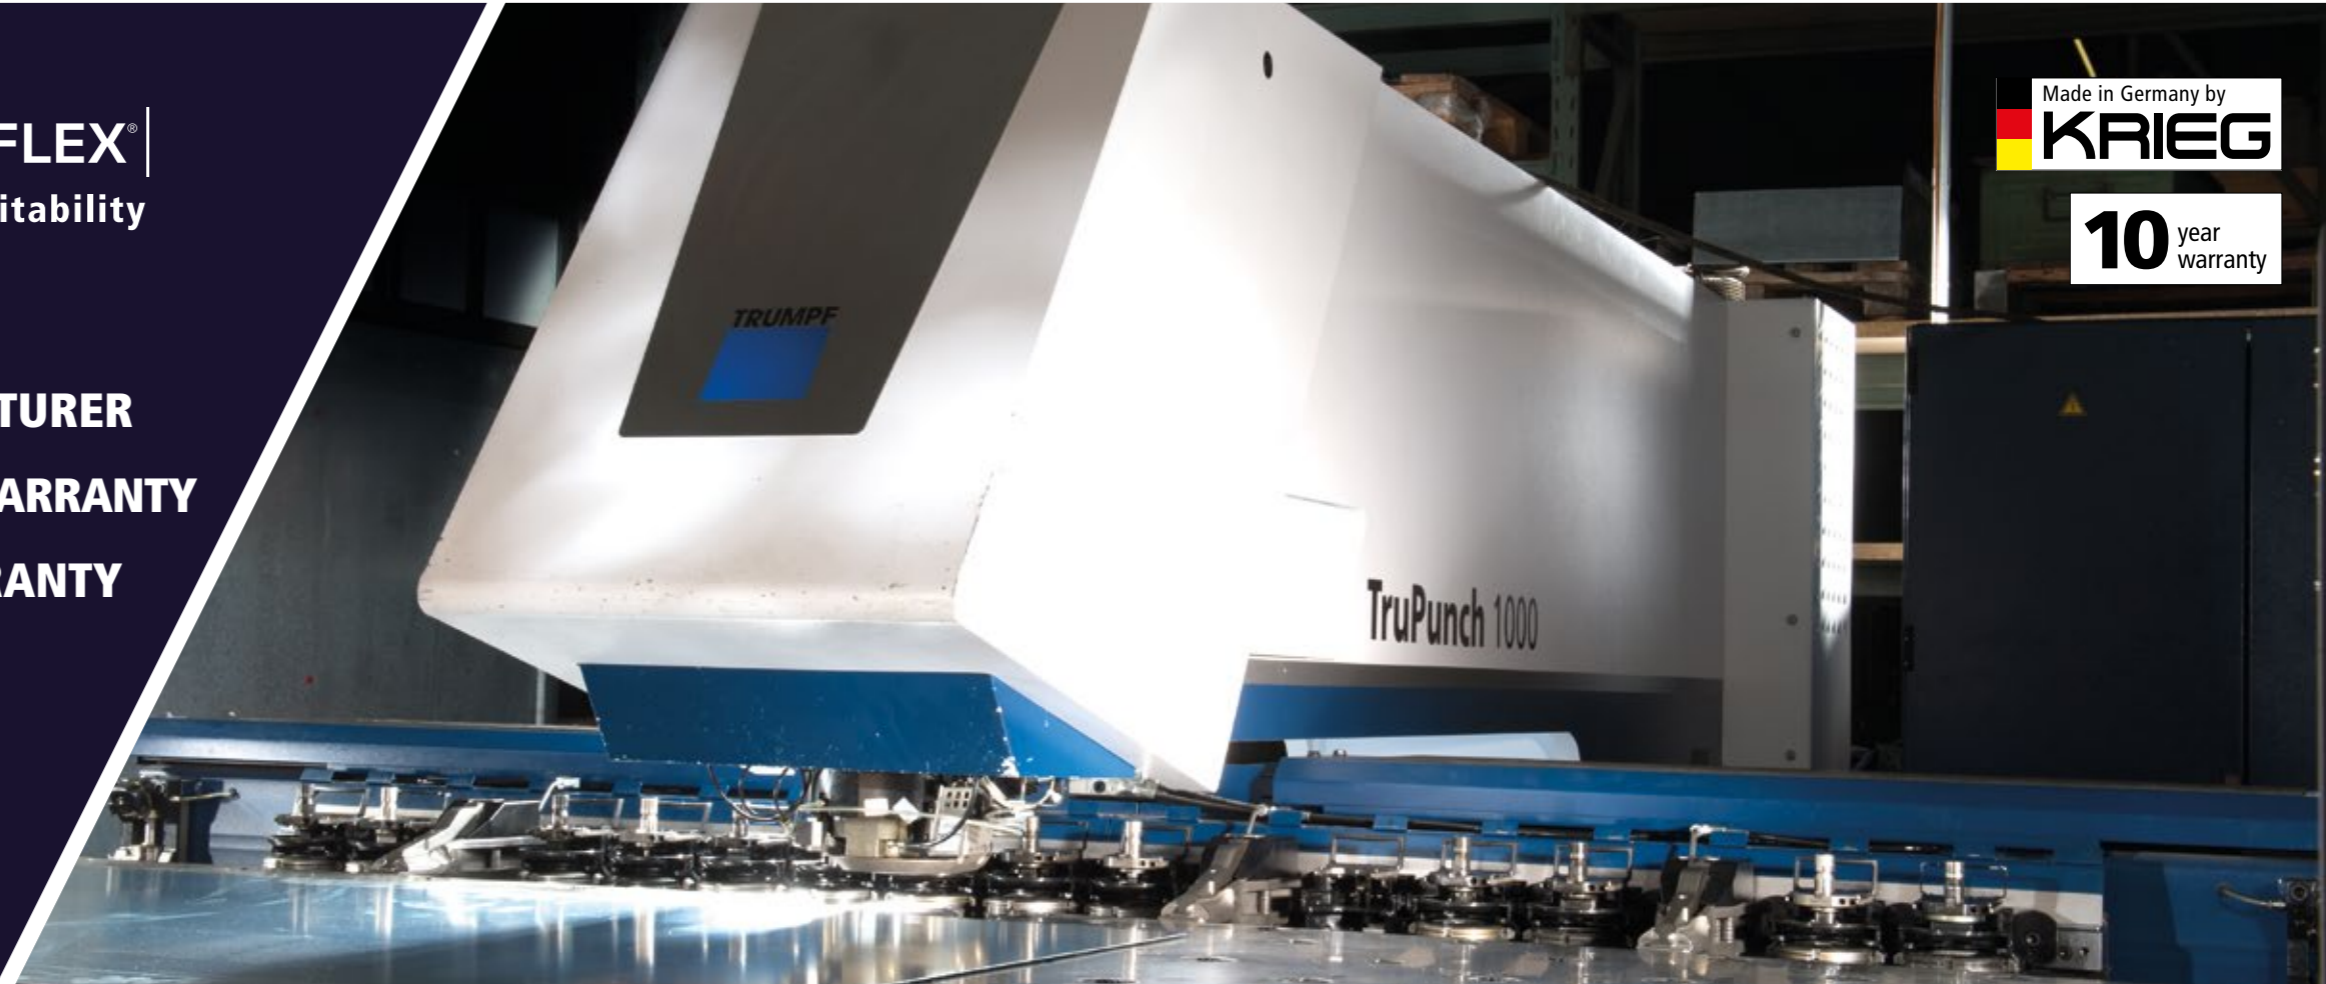

### Individuality delivers efficient results!

We ensure the greatest possible transparency by combining products from our tried and tested standard range with individual custom-made solutions.

**DIRECT FROM THE MANUFACTURER**  
**10-YEAR MANUFACTURER'S WARRANTY**  
**10-YEAR AVAILABILITY WARRANTY**

Made in Germany by  
**KRIEG**

**10** year  
warranty

## **MADE IN GERMANY – MADE BY KRIEG!**

We are a specialist manufacturer

### **We are a specialist manufacturer!**

We have three production centres in Germany with a total production area in excess of 15,500 m<sup>2</sup>, and it is here that we realise every project with the highest standards of quality. Our 67 years of experience combined with the latest scientific findings guarantee that we can create ergonomically optimised, yet economically efficient workstation solutions. It's a capability that benefits your operations and your workforce.

### **10-year manufacturer's warranty**

From the design stage to the on-site assembly phase - quality is our paramount concern. So we extend a 10-year warranty to all our in-house manufactured products. With our cutting-edge machine pool, specialist personnel, and continuous quality controls, you can be sure that our solutions will function effectively and smoothly as part of your operations from the very first day onwards.

## **IN-HOUSE PRODUCTION**

Save costs - buy from the manufacturer

### **Save costs - buy from the manufacturer!**

All our "Made by KRIEG in Germany" products are available to buy direct from the manufacturer – without any intermediate distributors. So you can be certain your investment will have the best possible price-performance outcome.

### **10-YEAR AVAILABILITY GUARANTEE!**

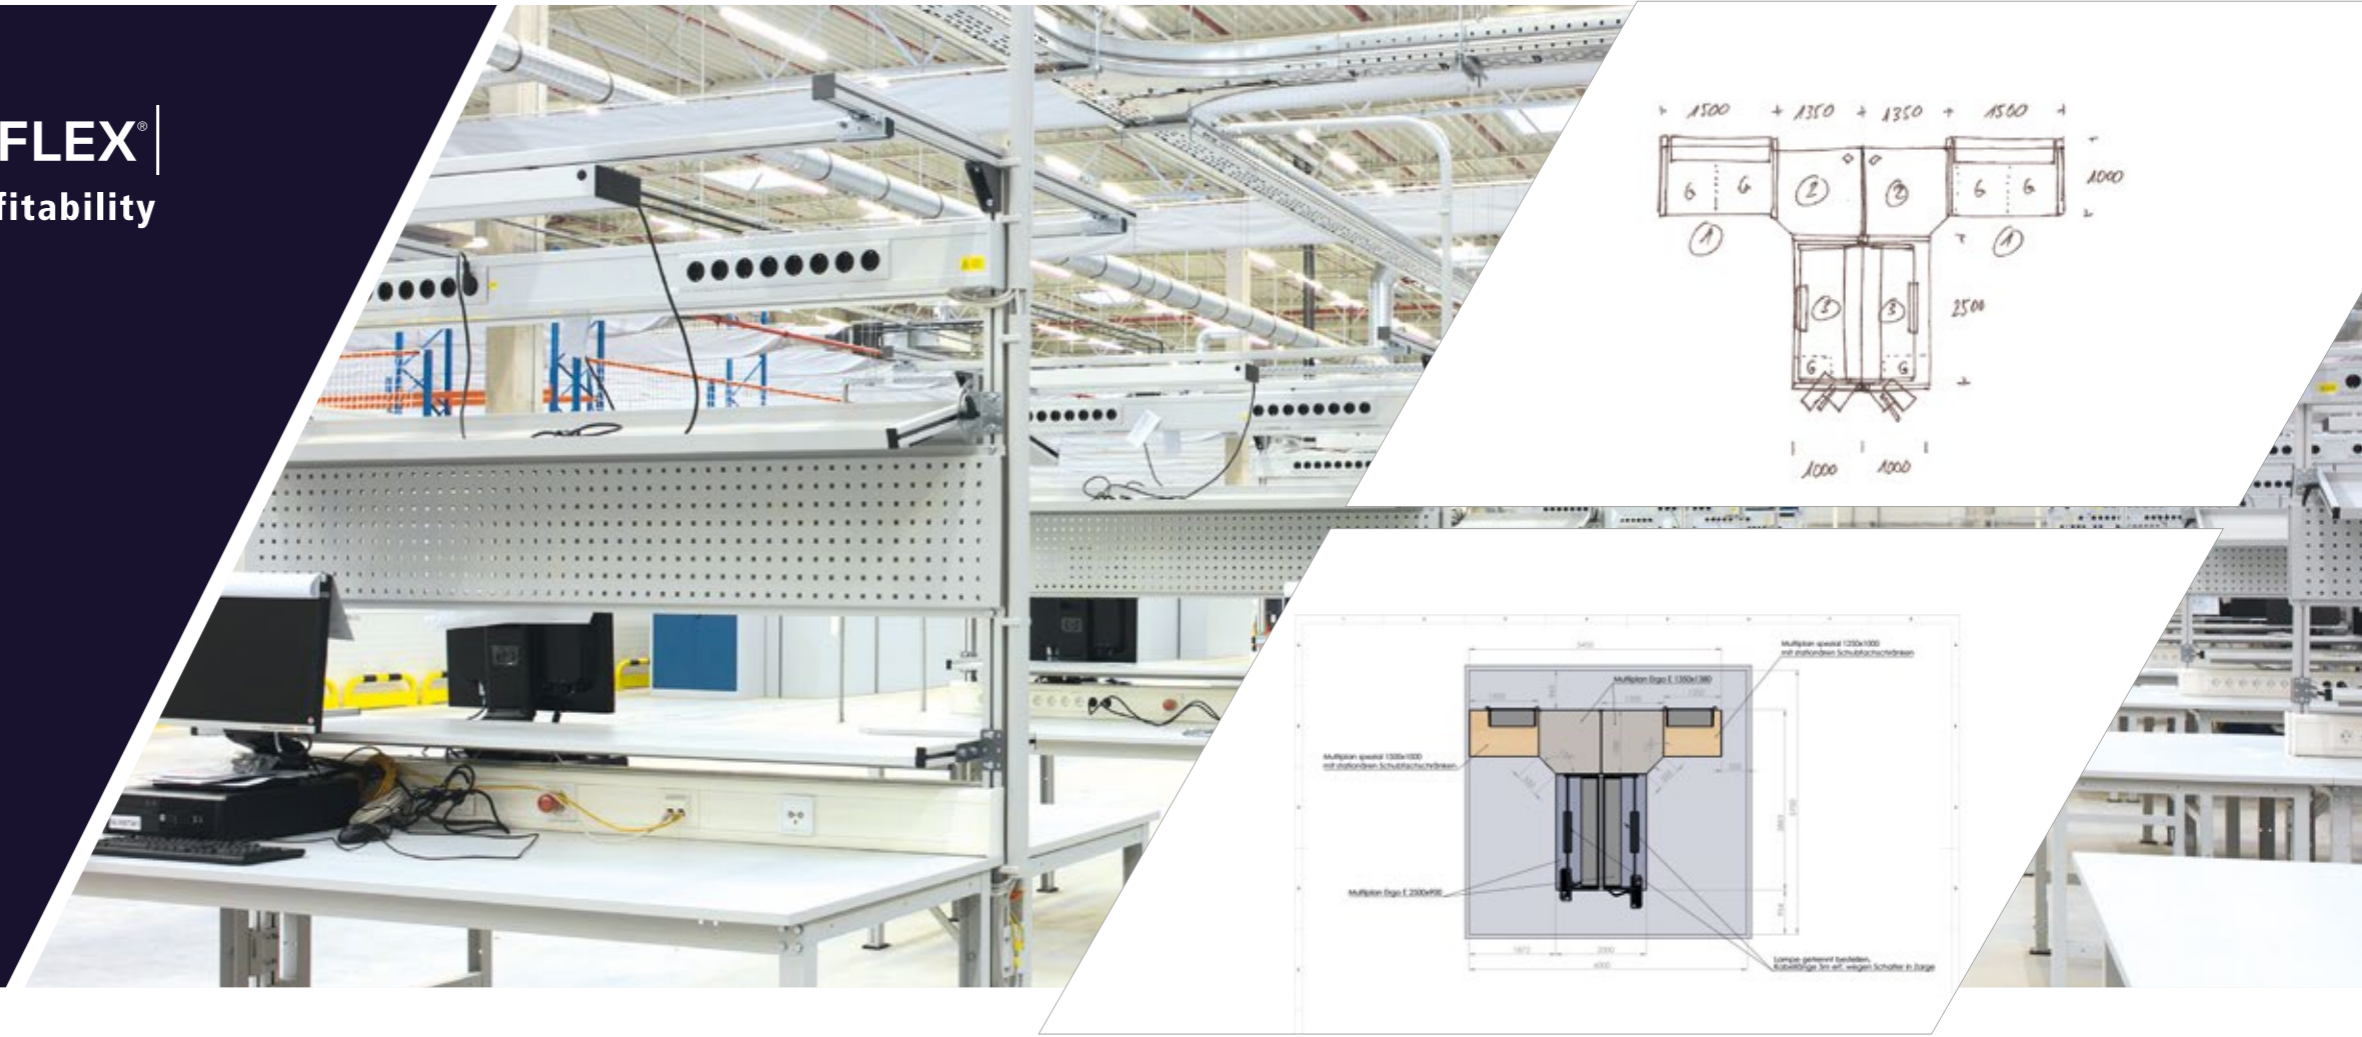

As a manufacturer, we can offer you certainty of planning by undertaking to upgrade and continuously develop your existing KRIEG workstation systems for at least 10 years under the KRIEG availability guarantee. And afterwards, our designers will always identify an economic solution to ensure our continued partnership.

**KRIEG** | **WORKFLEX**

**EXPERT ADVICE**  
**PROFESSIONAL PLANNING**  
**ON-SITE ASSEMBLY**

## ONE-STOP SERVICE

From the initial drawing to the turnkey assembly

Here at KRIEG, we offer our customers a comprehensive, no-worries service package comprising professional planning and design, an extensive selection including optimised accessories, expert consulting, and on-site assembly – all from our "one-stop service".

With customer satisfaction as our utmost priority, we will assist you from the initial idea to the realisation phase, all the time advising you based on our in-depth specialist knowledge. This is our comprehensive, no-worries service package we offer in order that you can achieve the best-possible result.

## IN-HOUSE-TRAINED SPECIALIST FITTERS

To ensure that everything fits down to the last millimetre

We focus closely on quality and precision in every step of the workflow - and the on-site assembly phase is no different. Our well-honed and highly skilled team of fitters assemble all our workstation solutions quickly and reliably, and these experts are your point of contact in the on-site turnkey realisation of our solutions.

**KRIEG** | **WORKFLEX**

**HIGH RETOOLING FLEXIBILITY**  
**PRACTICAL TEST WITH PROTOTYPE**  
**ON-SITE ASSEMBLY**

## **SAMPLE PROJECT** **M&C TECHGROUP**

**Added value through multi-variable ESD workstations**

**The mission:**  
Within the new production building offering 6,000 m<sup>2</sup> of space, the focus needed to be on variably configured ESD workstations to enable the rapid initiation of production for a range of product series. The complex energy supply to the workstations was the sticking point.

**The realisation:**  
A prototype was used to test and perfect the special requirements for the energy supply to the workstation. Individual cable ducts and centrally located extension columns were constructed to enable the pluggable components to be used for multiple sides. The workstations were configured and assembled in a systematic and multi-variable arrangement.

**COORDINATED PLANNING PROCESS**  
**ALIGNMENT WITH CONVEYOR SYSTEM**  
**HIGH RETOOLING FLEXIBILITY**

## **SAMPLE PROJECT**

### **ROTO FRANK AG**

Added value through integration into the conveyor system

**The mission:**  
Integration of packing stations that were connected to an automated conveyor line.

**The realisation:**  
The realisation took place within the logistics service centre. WORKFLEX and our customer closely consulted one another during the entire planning process.

**The Result:**  
Tailor-made picking and packing workstations.

Our sophisticated, modular designed system boasts an outstanding price-performance ratio, and enables you to plan in detail while guaranteeing rapid set-up and retooling times.

So evolving tasks can be accommodated flexibly and quickly, and with minimum fuss.

**REGULAR WORKSTATION CHECK**  
**AFTER-SALES SERVICE**  
**CONTINUOUS SUPPORT**

## PARTNERSHIP - MORE THAN MERELY A PROMISE FOR US

Continuous optimisation through personal support

After-Sales Service: We see ourselves as your workstation partner, and once the project has been successfully realised we will of course remain available to you whenever you need us. We seek to establish and grow long-standing partnerships with our customers – based on continuous support from our specialist consultants in the field or back office.

Whenever needed, these specialists will perform a regular ergonomics and productivity assessment on existing workstations in order to implement continuous optimisations or even adjustments in line with evolving production processes.
